

# How to make general mortar repairs

## using Blue Circle Cement

### Materials and Tools

- Blue Circle Mastercrete Cement
- Water
- Trowel
- Bucket
- Mixing board
- Mortar pointing tool
- Hammer & bolster chisel
- Stiff brush
- Plastic sheeting
- Safety gear

### Step by step guide

- 1. Prepare the Damaged Area** - Break out the damaged/failed mortar and affected bricks. Remove any loose material and clean the area using the brush. Remove any old mortar from bricks that will be reused.

- 2. Mix the Mortar** - Mix the Blue Circle Mastercrete Cement according to the instructions on the bag using a bucket or mixing board. Make sure the mix is of even colour and consistency.

- 3. Making the repair** - Lay the new mortar as required to replace the bricks. Finish the repair using the pointing tool and cover with plastic sheeting for at least 24 hours to allow to cure fully.

Clean your tools promptly after finishing to prevent any material from hardening on them.
