

MT158

MT158

MT160

MT156

Existing field converted from arable to riverside pasture.

MT157

Hedgerow H15 - H18 to be gapped up as appropriate.

MT160

River Medway

PHASE 4

Existing hedgerows managed to maintain diversity of habitats for nesting birds.

PHASE 5

Identify suitable location for the translocation of vegetation (including true fox sedge) from Ditch D7.

PHASE 3

Scrub planted with alder/willow (NVC Woodland W6) and managed to provide suitable habitat for nightingale

PHASE 6

Western section of restoration within Stonecastle Farm Quarry adapted to reedbed using overburden from the proposed western extension area.

PHASE 1A

PHASE 1B

PHASE 2

Carr woodland (NVC Woodland W6) planted and dyke margin re-profiled to provide habitat for otter/water voles.

Existing boundary hedgerow to be gapped up as appropriate.
