

VERIFICATION STATEMENT

Over the years, certification to BES 6001, the framework standard for responsible sourcing, has become increasingly significant in the construction industry. BES 6001 requires that construction product manufacturers demonstrate levels of achievement against a series of clauses, some of which are compulsory and others being deemed as deserving of additional credit when the company goes above and beyond the compulsory level. Depending upon the score achieved by the organisation, it is possible to gain a Pass, Good, Very Good or Excellent rating. Higher levels of performance are achieved (in part) through external verification of certain clauses of the BES 6001 standard. This is particularly important for those organisations wishing to certify to an Excellent rating, as this rating cannot be achieved without this verification.

This is the external verification statement for BES 6001 environmental and social activities, based on data as to be reported by Tarmac in their 2025 Sustainability Report.

NATURE AND SCOPE OF VERIFICATION

CM Environmental has carried out an independent verification of the Tarmac KPIs and can confirm that they have not, in any way, been involved in the preparation of this data, nor have any bias or conflict of interest. The verification study has included a number of environmental and social issues which relate to specific clauses of BES 6001 version 4.

The scope of the data verification included all Tarmac UK sites.

The purpose of the verification exercise was to ensure that the information conveyed to stakeholder and other interested parties is accurate and supported by appropriate documented evidence. The specific clauses of BES 6001 relevant to this verification exercise include the following:

- 4.4.1 Greenhouse gas emissions
- 4.4.3 Resource use and product circularity
- 4.4.4 Waste prevention and waste management
- 4.4.5 Water usage or abstraction
- 4.4.12 Employment and skills
- 4.4.13 Local communities

STATEMENTS OF THE INDEPENDENCE OF THE VERIFIERS

CM Environmental has been providing support to a large number of clients involved in the manufacture of construction products since 2013. Although a small company, the team has many years' experience in supporting companies, both large and small, in a range of services including Environmental Management Systems (ISO 14001), Responsible Sourcing (BES 6001) and also a range of Quality Management issues (ISO 9001) and Health and Safety Management (ISO 45001).

The verification exercise was carried out by Christine Morris, who has experience of Responsible Sourcing in the construction products industry and is approved by the Building Research Establishment (BRE) as an independent KPI data verifier.

CONCLUSION

Based on the procedures followed by CM Environmental during this independent verification exercise, there has been no evidence that the data supplied to the Tarmac Sustainability Report, for the period 1st January to 31st December 2025, has not been obtained based on reliable basis, that the information is not adequately presented, or that significant deviations or omissions exist. Verified figures can be used in support of sustainability reporting.

A handwritten signature in black ink that reads "C. Morris".
